SILCOLAN SPRAY EMOLLIENT

For Professional Embalming Use Only.
Before using, read Material Safety Data Sheet.

<u>Size</u>	<u>Item Number</u>
Aerosol	619000
Pump	619001

DESCRIPTION

Silcolan is a clear emollient spray for use on the face, neck, and hands. It can be used before, during, and after embalming. It will seem to soak in as it dries, leaving a clear film, unlike rub-on emollient creams (White Kalon Cream, for example) which leave a shiny, wet-look film.

FEATURES

Silcolan is a unique blend superior to all similar spray emollients currently available. It contains silicone, lanolin derivatives, emollient esters, and jojoba oil (as well as other ingredients). It creates a smoother texture, will prevent moisture loss, lubricate, and maintain pliancy. It's compatible with all types of cosmetic applications. It can also be sprayed as a lubricant on arterial tubes, drain tubes, and trocars. This will allow ease of entry and can prevent a vessel from being ruptured upon insertion.

APPLICATION

Shake gently before spraying. Be sure spray head aperture points away from you. Apply over clean areas. Spray uniformly from a distance of 4 to 6 inches. Use light, feathered strokes and apply in thin layers. To clean nozzle, invert can during last moment of spray.

Contents under pressure. Do not puncture or incinerate container. Do not store in direct sunlight or where temperature exceeds 120 degrees Fahrenheit, or bursting may occur. Flammable. Contains isopropyl alcohol. Spray only in well ventilated areas. Avoid prolonged breathing of vapors. Keep out of reach of children. Contains no chlorofluorocarbon propellants. MSDS available.
